

## Application of Lean / Agile for business and product development. Use of SAFe.

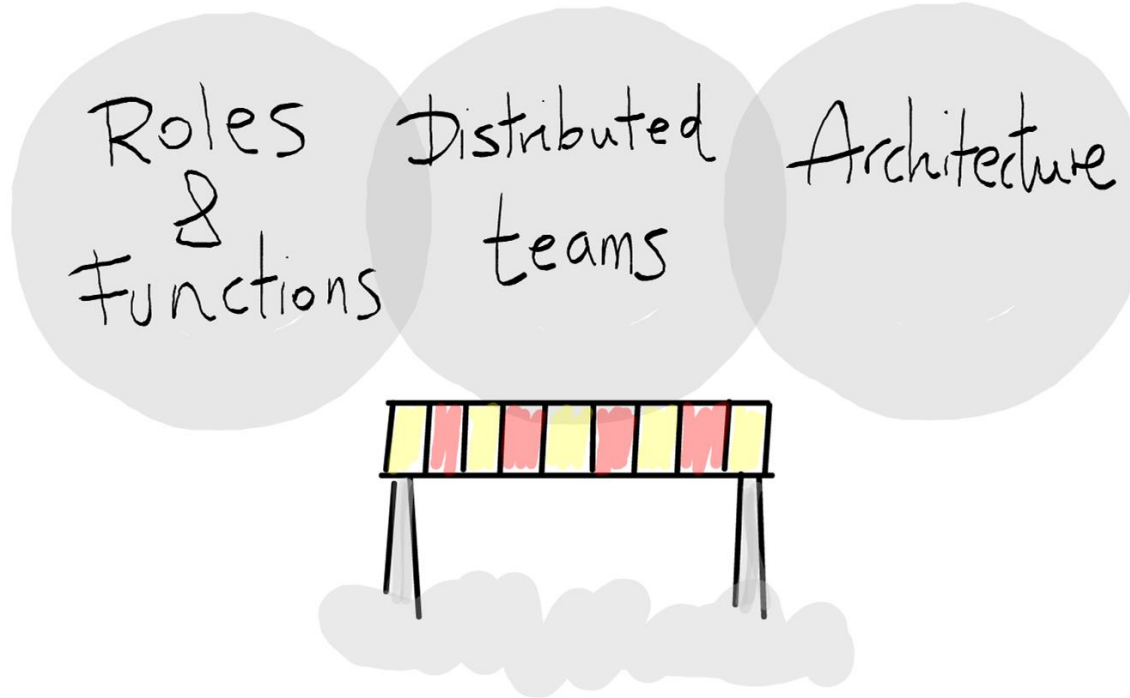

Carlos Piqueres (Head of GFT Agile Practice) y  
Laura Grau (Lean Agile Leader)

- **Our Environment – Who we are**
- **The program we work for**
- **The challenges we've faced**
- **Our approach**
- **Wrap up**
- **Q&A**

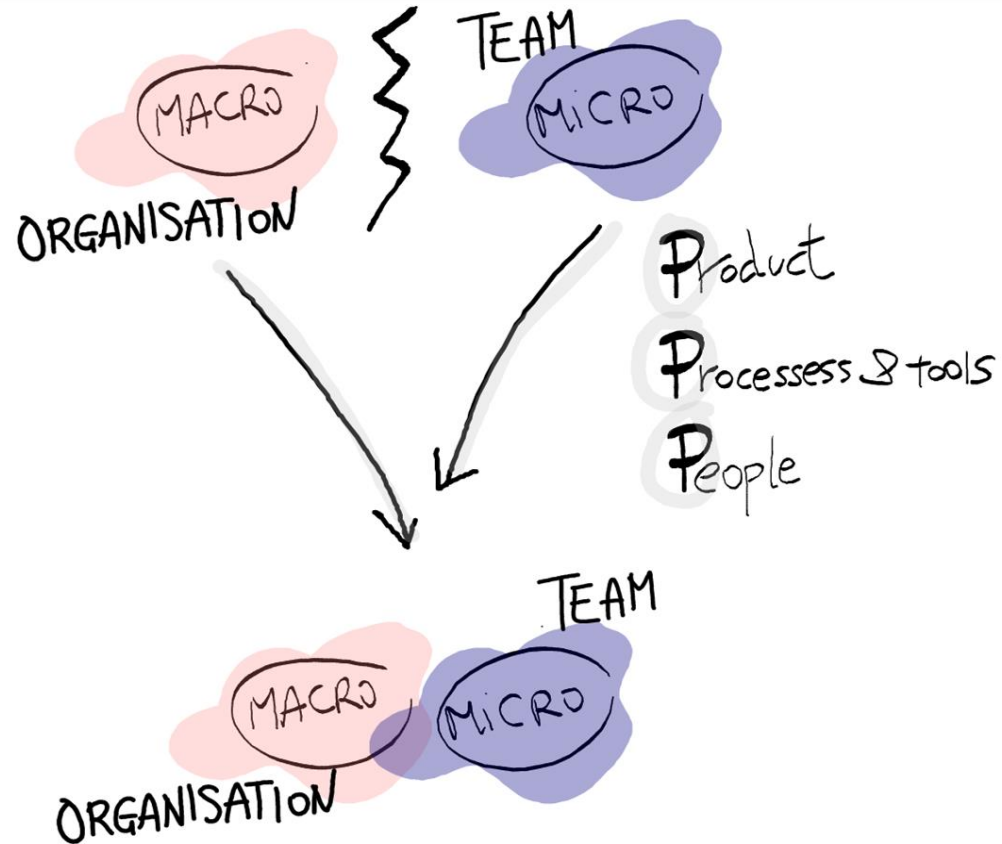

## Set up of the program. The development value stream:

- More than 12 locations
- Multiple time zones
- Big bank- organisational constraints
  - Architecture guidelines
  - Compliance
  - Business vs IT...

- A set of **principles based** on Communication theory, Queue theory, Economic focused, Knowledge management and Systems Behaviour.
- Providing **guidance to design organisations** and the way they operate (enterprise, product development, teams)
- Aiming to **optimise the business value** delivered by reducing the risk, **reducing the cost of change** and hence **optimising the ROI**
- To achieve so, several **tools** (Scrum, Kanban, SAFe, Less, DevOps, Test Automation, painting the walls ...) can be used (and **tailored**)

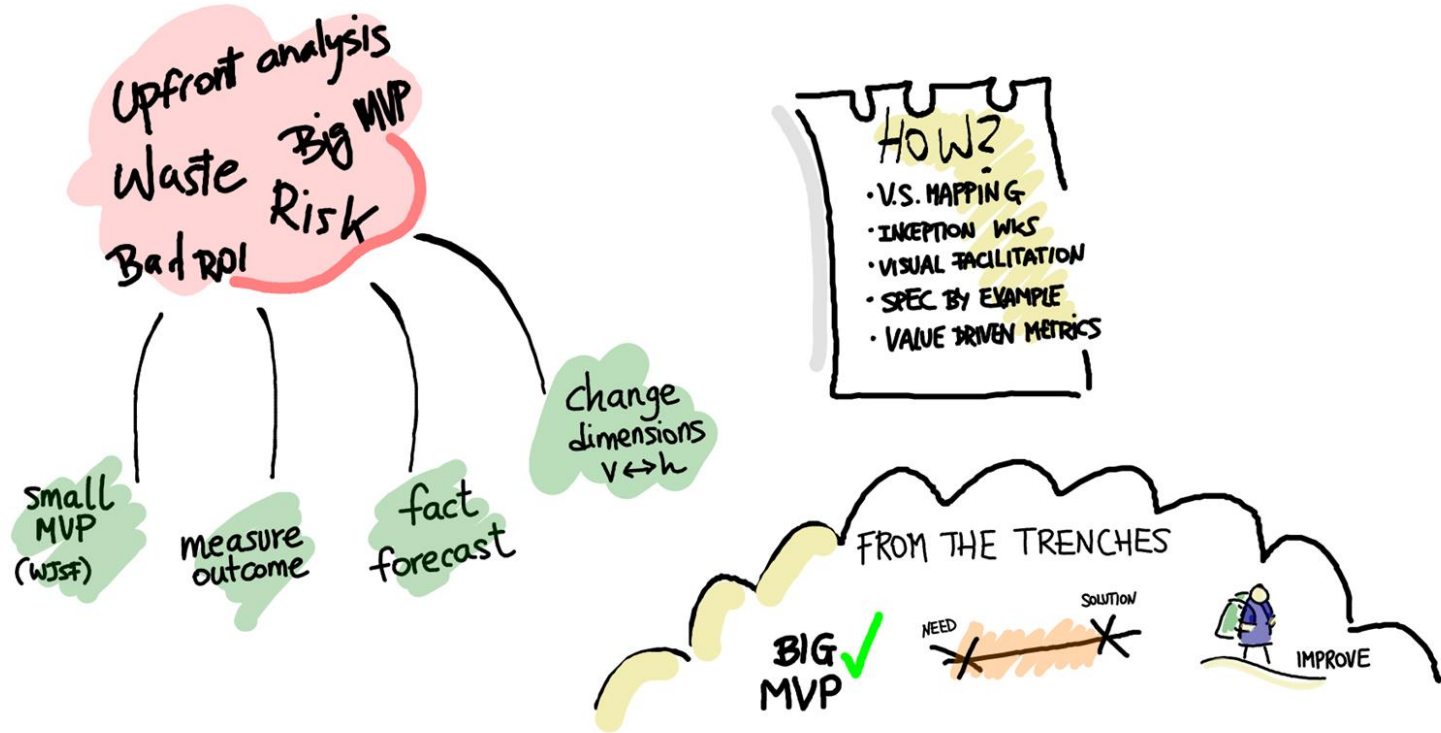

**We do not confuse the means with the ends.**

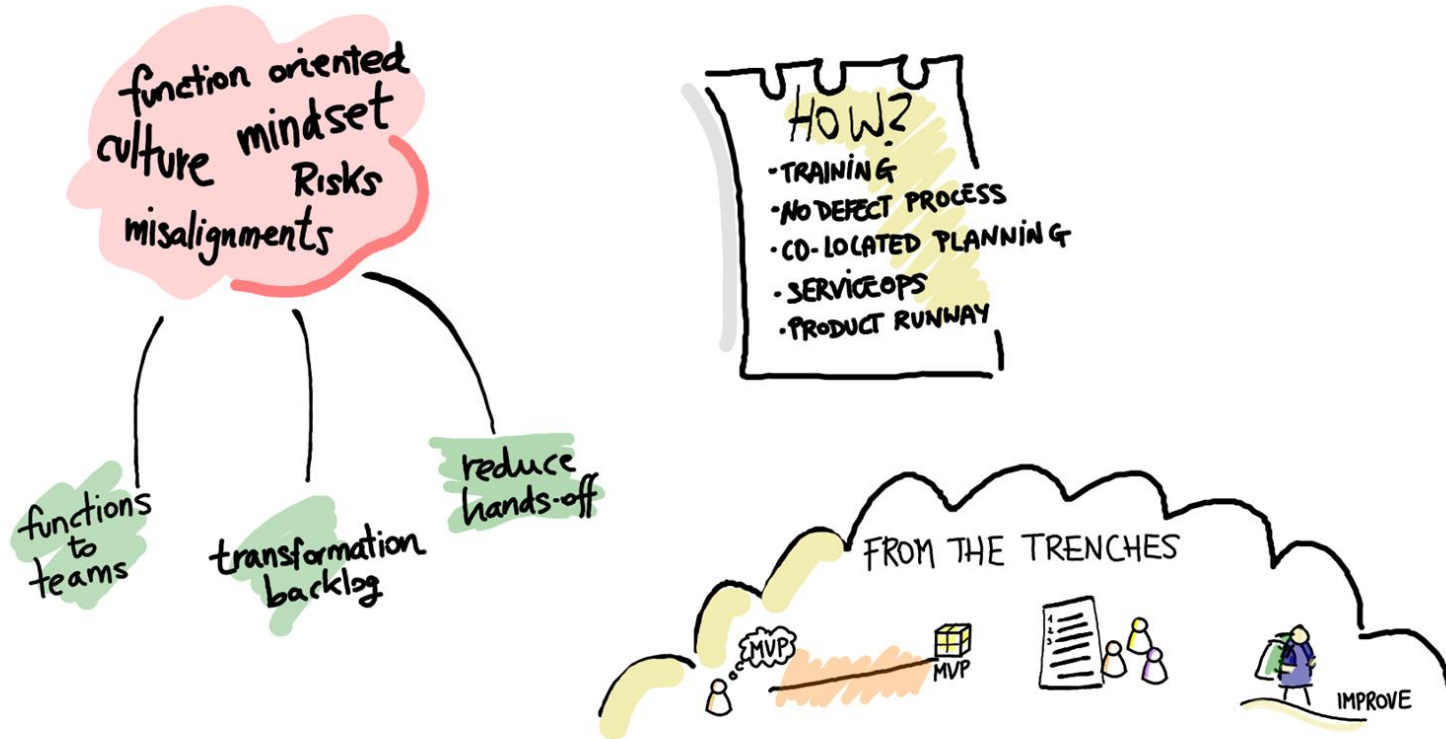

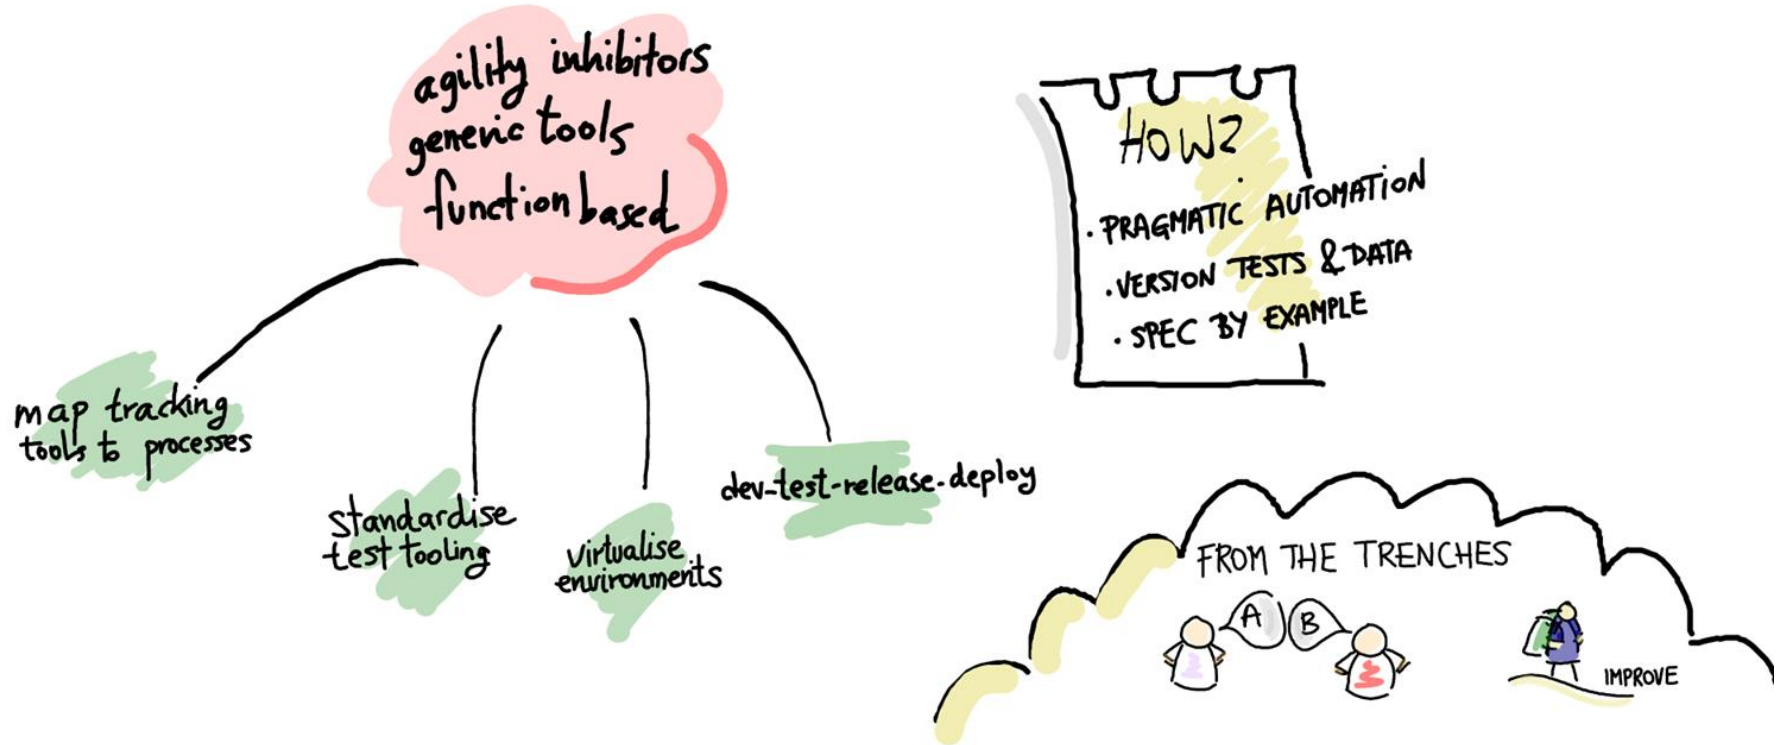

- **Product**
- **Processes and Tools**
- **People**

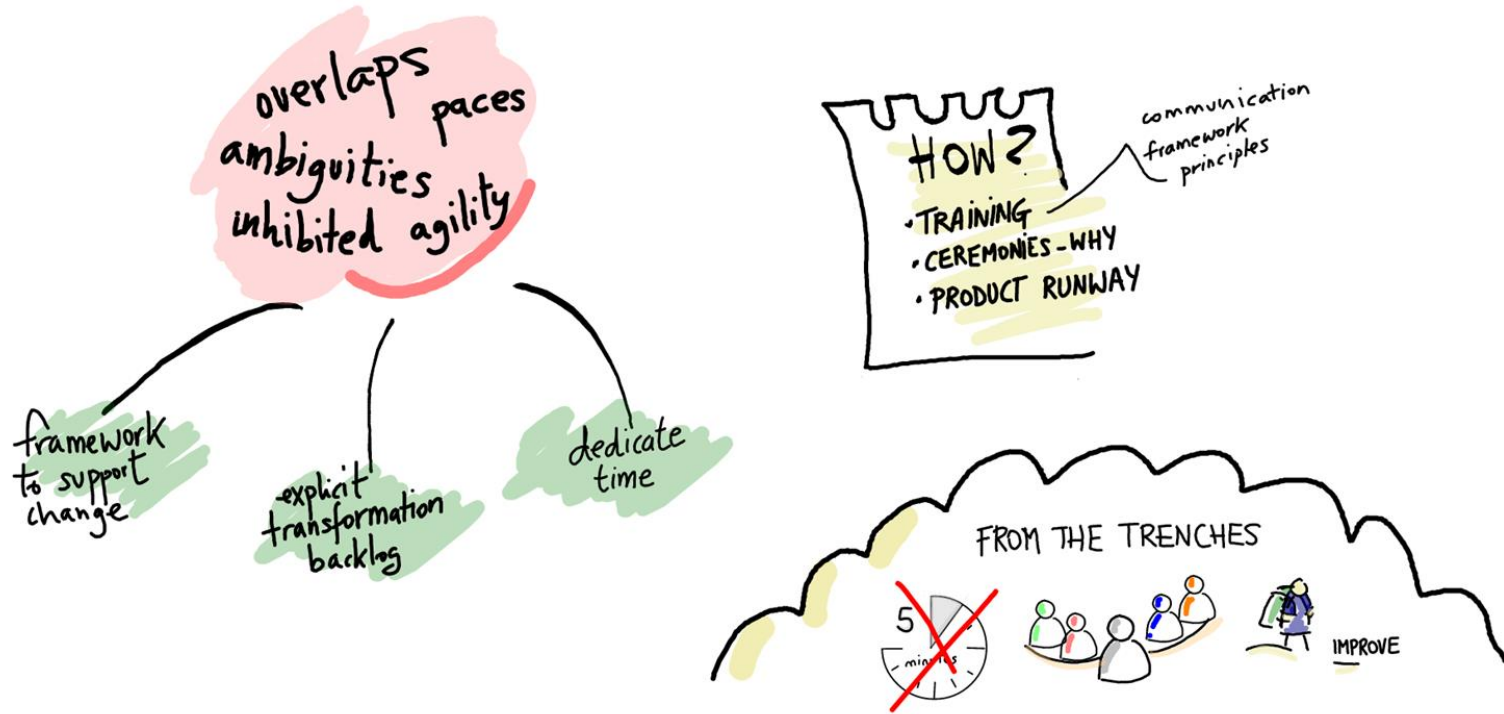

**We do not confuse the means with the ends.**

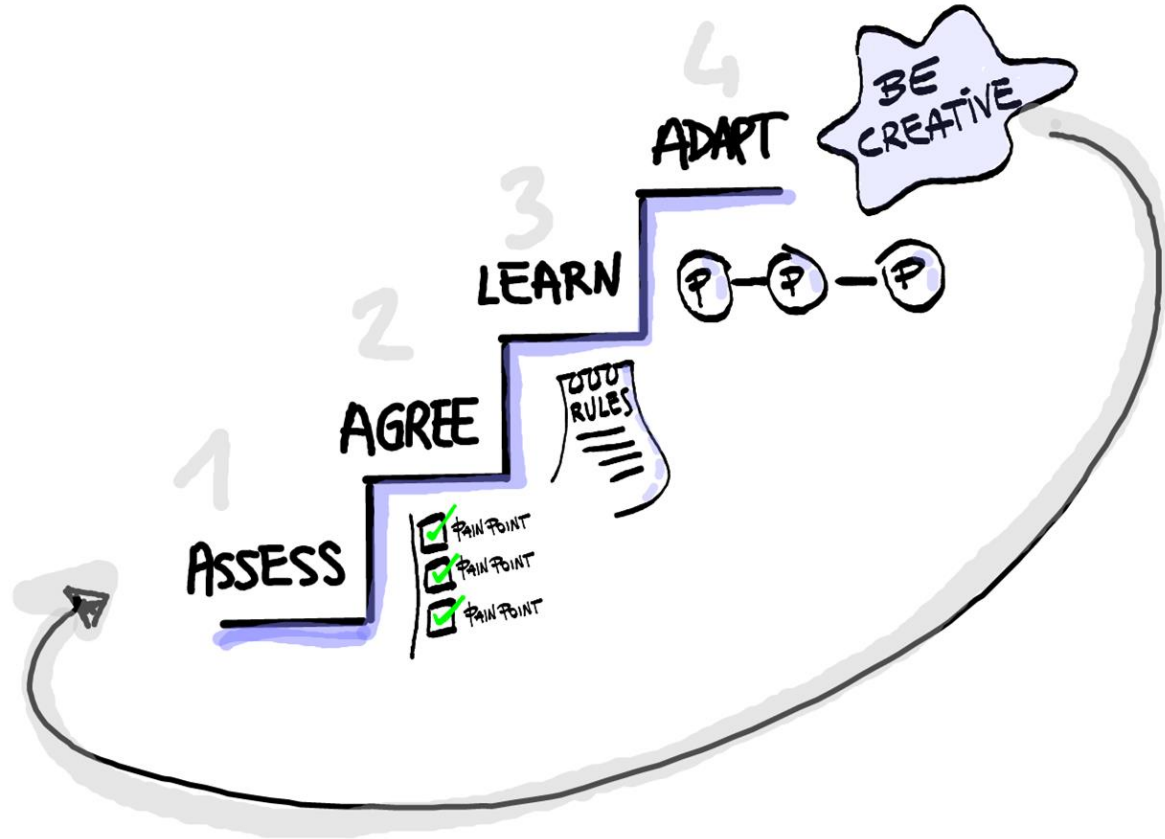

# Q & A
